

ANAN SERBESA

SOFTWARE ENGINEER

 **Location:** Addis Ababa, Ethiopia

 **Phone:** +251 938 563 663

 **Email:** ananserbesa@gmail.com

 **Portfolio:** ananserbesa.netlify.app

 **GitHub:** github.com/AnanSer

 **LinkedIn:** linkedin.com/in/an-an-serbesa

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building full-stack web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Completed a Software Engineering internship at the Space Science and Geospatial Institute (SSGI), where I helped build and connect real institutional systems. Comfortable working across the full stack in team settings, with growing experience using AI tools to automate tasks and build smarter applications.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Design
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control
Databases	MongoDB, PostgreSQL, MySQL, Supabase
Cloud & DevOps	AWS, Docker, Vercel, GitHub
AI & Automation	AI Automation, Retrieval-Augmented Generation (RAG)
Tools	Git, Postman, VS Code
Practices	OOP, Data Structures & Algorithms, SDLC, Agile/Scrum, API Integration, Debugging

PROFESSIONAL EXPERIENCE

Software Engineering Intern — [Space Science and Geospatial Institute \(SSGI\)](#)

Mar 2025 – Jun 2025

- Built and maintained responsive institutional web modules in React.js, working directly with staff to translate reporting workflows into usable interfaces.
- Partnered with backend developers to design and integrate RESTful APIs connecting frontend applications to institutional data services.
- Identified and resolved usability and performance issues through structured testing and debugging, improving day-to-day reliability of internal tools.
- Took part in Agile ceremonies (standups, sprint planning, code reviews), contributing to a team codebase shared across multiple developers.

FEATURED PROJECTS

Digital Traffic Fine Management System (DTFMS) — [Full-Stack Developer](#)

Tech Stack: Next.js • Node.js • Express.js • Supabase • Tailwind CSS

Website: <https://traffic-ease.vercel.app/>

- Designed a full-stack traffic fine management platform serving four distinct user roles: Drivers, Vehicle Owners, Traffic Officers, and Supervisors.
- Implemented secure authentication and role-based dashboards controlling access to violation records and payment workflows.
- Built the reporting module end-to-end, giving supervisors visibility into fine status and officer activity.
- Collaborated with a development team on system architecture decisions to keep the platform scalable as new roles and features were added.

Letter Management System — [MERN Stack Developer](#)

Tech Stack: MongoDB • Express.js • React.js • Node.js

Website : <https://let-proj.vercel.app/>

- Built a secure institutional system for creating, routing, approving, and archiving official letters and documents.
- Implemented role-based authentication and RESTful APIs to support multi-step organizational approval workflows.
- Designed responsive interfaces that replaced manual, paper-based tracking with a searchable digital record.

Panorama Cafe — Addis Ababa — Frontend Developer

Tech Stack: Next.js • Tailwind CSS • Responsive Design

Website : <https://fluffy-tanuki-a34b28.netlify.app/>

- Designed and built a responsive marketing website for a local café, showcasing the menu, location, and ambiance.
- Focused on clean visual design and fast load times to give visitors an inviting first impression on both mobile and desktop.

Premium Ethiopian Suit E-Commerce Platform — Full-Stack Developer

Tech Stack: Next.js • Node.js • MongoDB • Tailwind CSS

Status: Built and functional; not yet deployed live

- Built a full e-commerce platform covering product catalog, cart, checkout, and order management.
- Implemented secure customer authentication and an admin flow for managing products and orders.
- Optimized frontend components for mobile and desktop, prioritizing fast load times and an intuitive shopping flow.

EDUCATION

Bachelor of Science in Software Engineering — Haramaya University

2022 – 2026

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Web Development, Distributed Systems

CERTIFICATIONS

- AWS Certified Cloud Practitioner — aws.amazon.com/certification/certified-cloud-practitioner/
- Introduction to MongoDB — MongoDB University — learn.mongodb.com
- ALX Professional Foundations — www.alxafrica.com/tag/alx-ethiopia/
- Udacity: Programming Fundamentals — www.udacity.com/

ACHIEVEMENTS

- Completed a Software Engineering internship at the Space Science and Geospatial Institute (SSGI).
- Competed in the Cursor Hackathon East Ethiopia at Haramaya University, building a working software solution within a fixed-time competition.
- Developed multiple full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.
